

QGPluginManager

QGPluginManager

QPluginManager< Type >

```
graph BT; A[QPluginManager< Type >] --> B[QGPluginManager]; A --> C[QGPluginManager];
```

The diagram illustrates a class hierarchy. At the bottom, a box labeled 'QPluginManager< Type >' has two arrows pointing upwards to two separate boxes at the top, both labeled 'QGPluginManager'. This indicates that 'QPluginManager< Type >' is a base class or template for the two 'QGPluginManager' classes.
